Sales Performance Analysis

Global Sales & Profitability Insights:
Multi-Channel Performance Analysis

Presented By:
Ashfa Rofiqoh

This report highlights a comprehensive analysis of global sales performance, featuring regional profitability across various countries, product-specific margin trends, and an evaluation of multi-channel distribution efficiency (Online vs. Offline).

Project Overview

Background

The company is a global retailer selling various products (Cosmetics, Baby Food, Office Supplies) via Online and Offline channels. As the business scales, it aims to shift from basic sales tracking to a strategic, data-driven approach to better understand its profitability drivers and operational efficiency.

Problem Statement

Despite high total revenue, the company faces three critical challenges:"

- **Profitability vs. Revenue:** Difficulty in identifying high-margin products and countries versus those that only drive volume with low returns.
- **Channel Efficiency:** Lack of clear comparative insights between Online vs. Offline performance across regions.
- **Cost Volatility:** Fluctuating unit costs and sales expenses that significantly erode profit margins in high-volume categories.

Goal

The primary goal of this project is to provide a comprehensive Sales Performance & Profitability Analysis that identifies the most lucrative markets, products, and channels to help the management team make informed strategic decisions for the upcoming fiscal year.

Objectives

- **Identify Top Performers:** Pinpoint the most profitable countries and high-margin products (e.g., Cosmetics vs. Office Supplies).
- **Evaluate Channel Efficiency:** Compare profit margins between Online and Offline channels to identify the most cost-effective route.
- **Analyze Sales Trends:** Visualize yearly and monthly patterns (2010–2017) to detect seasonal peaks and growth.
- **Ensure Data Integrity:** Perform data cleaning and outlier handling to guarantee accurate financial reporting.

Really Great Site

Tools and methodology

Microsoft Excel

This project was developed using Advanced Excel to transform raw datasets into an interactive business dashboard. The methodology includes:

- Data Transformation: Performed **data cleaning** and **categorization** using **IF functions** for logical labeling and **VLOOKUP, Counting Functions, TEXT** to consolidate information from multiple reference tables.
- Financial Analysis: utilized **Pivot tables** and **calculated fields** to aggregate Total Revenue and Total Profit across diverse dimensions (Regions, Item types, and Sales Channels).
- Interactive Dashboarding: Designed an interactive dashboard using **Slicer-controlled Pivot Charts** to allow seamless filtering and real-time data drill-downs

Dataset Overview

The analysis utilizes a Global Sales Dataset sourced from **Kaggle**, consisting of transactional records across various regions and product categories. The data was processed to evaluate business performance and profitability trends.

Dataset Components:

- Categorical Data: Country, Region, Item Type, and Sales Channel.
- Time-Series Data: Order Date and Ship Date (Used for Yearly & Monthly Trend analysis).
- Financial Data: Detailed records of Unit Cost, Total Revenue, Total Profit, and Sales Expenses

100_Sales.csv (8.74 kB)		/kaggle/input/100-sales/100_Sales.csv	Copy	10 of 10 columns		
Region	Country	Item_Type	Sales_Channel	Order_Priority	Ship_Date	Unit_Cost
Australia and Oceania	Tuvalu	Baby Food	Offline	H	27/06/2010	159.42
Central America and the Caribbean	Grenada	Cereal	Online	C	15/09/2012	117.11

Explore the interactive features and key business insights in the following slides.

Interactive Dashboard Features:

Interactive Dashboard Features:

- Time-Series Navigation: Integrated Timeline for dynamic period analysis (Yearly/Monthly).
- Multi-Attribute Slicers: Quick-filter functionality by Product Category, Sales Channel, and Country.
- Cross-Filter Connection: All charts and KPIs (Revenue & Profit) update instantly when a filter is applied, allowing for deep-dive regional or categorical analysis.

KPI & Profitability

Throughout the 2010–2017 period, the company successfully recorded a Total Revenue of IDR 11.22 Billion with a Total Profit of IDR 3.31 Billion. This achievement reflects stable business scalability in the global market, backed by strong financial fundamentals.

- Average Profit Margin per Category (34.9%): Utilized as a product efficiency benchmark to mitigate volume bias from high-revenue categories.
- Efficiency Drivers: Clothes and Cosmetics serve as the primary margin contributors, providing a strategic profitability balance against high-volume essential goods like Household items.

Total Revenue:

Rp11.220.771.199

Total Profit:

Rp3.310.469.514

Total Profit Margin Per Category:

34,93%

Product Performance Analysis

- Top Efficiency Drivers: Clothes (67%) & Cosmetics (43%) – Best profit-per-unit performance.
- Revenue Anchor: Household & Office Supplies – Primary drivers for total global revenue.
- Strategic Mix: Kombinasi produk kebutuhan pokok dan produk gaya hidup menciptakan portofolio bisnis yang resilien terhadap fluktuasi pasar.

Regional Profitability

Top 8 Countries by Profit

Our regional analysis identifies the top-performing countries that contribute most significantly to our net profit. By focusing on these high-growth regions, the company can optimize its marketing budget and supply chain efficiency.

Sales Channel Analysis

Comparing Online and Offline channels reveals where our customers are more active and which channel delivers better margins. This insight helps in deciding our future distribution strategy.

Conclusion & Strategic Recommendations

Prioritize High-Margin

Increase marketing efforts and promotional campaigns for Clothes and Cosmetics to maximize overall profitability.

Optimize High-Volume Operations

Conduct a cost-structure review for the Household category to identify potential operational efficiencies and improve its net margin.

Strategic Market Expansion

Focus resource allocation and market penetration on the Top 8 most profitable countries identified in the regional analysis.
